

Are you working with adolescents in your community?

Enhance your impact with a fully-funded MPH degree from Johns Hopkins Bloomberg School of Public Health

The Bloomberg Fellows Program is accepting applications from individuals who are working on issues affecting adolescents. We are seeking educators, law enforcement, policymakers, health professionals, advocates and community workers, among others, who want to help prevent and address youth disconnection. This program offers a full scholarship and \$10,000 stipend for the Master of Public Health (MPH) program at Johns Hopkins Bloomberg School of Public Health.

The Bloomberg American Health Initiative

The Bloomberg American Health Initiative is a unique program that aims to improve health and save lives in the United States by tackling complex and urgent health challenges. There is special attention throughout the Initiative on advancing equity, using evidence, and changing policy. We seek to equip fellows with new knowledge, skills and tools to understand and prevent youth disconnection.

The Bloomberg Fellows Program

The Bloomberg Fellows Program is not your traditional scholarship program. It supports people who are already making an impact in their communities, as well as their organizations on the front lines of change.

Candidates must apply with support from the organization for which they work. Fellows can choose to pursue the MPH degree full-time or part-time, primarily in Baltimore or primarily online from their home location. After graduation, fellows take their skills back to their organizations and work for at least one year. Their organizations have opportunities to join an innovative national network working to support adolescents at risk.

Successful candidates to the Bloomberg Fellows Program must also apply and be accepted to the school's MPH program. As part of your MPH degree, you will receive training in core topics including epidemiology, statistics, behavior change, management, policy and problem solving, and others, as well as take courses specifically related to adolescent health.

The Bloomberg Fellows Program strives for a highly diverse class in terms of race and ethnicity, income, geography, and other key areas.
